

Waste Management instruction for vessels

In Joensuu port area, instructions for waste management must be followed by taking in and handling waste from vessels and port operations. These instructions are based on laws and regulations on waste management given by the European Union and Finnish State. By following these instructions and delivering waste appropriately to waste collection stations, an environmental load caused by waste from vessels and port operations can be decreased and contaminations of marine environment prevented.

WASTE MANAGEMENT CHARGE OF VESSEL INCLUDES:

- ENERGY WASTE
 - packaging plastics (not PVC), dirty paper and cardboard,
 - wooden packagings, plastics (not PVC), polystyrene, textiles,
